How is this different than the Voids Report?

- This report is similar to the Voids Reports, however, there are two main differences.
- This report includes custom time ranges which does not limited you to the 30/90 window.
 - This report will return items that have never shipped along with those that have.

What am I looking at?

- 1) Store Count: This will count distinct stores that are available for distribution in the selected Groups.
- 2) Stores Shipped: This will count distinct stores that have been in distribution.
- 3) %: This is the Penetration % of stores in distribution for the given count of available stores.
- 4) Cases: Case distribution volume for the selected item(s).

How are potential voids calculated?

Potential Voids are flagged items that have once been in distribution in the last 52 weeks but have not been in distribution within the latest 30/90 days depending on the view you are in.

What are the numbers telling me?

- 1) Count of all available stores in your selection.
- 2) Count of all available items for evaluation in your selection.
- 3) Count of all the stores that have items flagged as a potential void.
- 4) Count of all items that are flagged as a potential void.

[How to use On Visual Drill features](#)[How to use Drill Through features](#)[How are potential voids calculated](#)[Potential Voids vs KPI Tracker](#)[How to export to Excel](#)[Contact support at:](#)[Masked](#)

Export to Excel

Some visuals allow export of data to Excel for further customization and analysis. The "More Options" feature will appear on the top right corner of the visual as you hover over the visual with your mouse.

More options View the additional options available for the visual ...

- Share >
- Add a comment
- Export data
- Show as a table
- Spotlight
- Get insights
- Sort descending
- Sort ascending
- Sort by >

Which data do you want to export?

Export your data in the format that suits your needs. If you have a lot of data, the number of rows you export might be limited depending on the file type you select. [Learn more about exporting data](#)

Data with current layout

Export this data in the same layout you see now, but without any icons, colors, or other formatting you added.

Summarized data

Export the summarized data used to create your visual (for example, sums, averages, and medians).
